DISCUSSION:

The El Dupont De Nemours & Company - Houston Plant site is located at 12501 Strang Road in LaPorte, Texas. This site is an active multi-process biochemical manufacturing facility. Chemicals manufactured currently and in the past include, but are not limited to gamma-BHC, aniline, carbamate fungicide, parachloroaniline, dichloroaniline, hydrofluoric acid, sulfuric acid, tetrahydrofuran, amines, formaldehydes, fungicides, herbicides, insecticides, polyvinyl alcohol, soil fumigants, and vinyl acetate.

A Preliminary Assessment (PA) was completed at the site in January 1983. A Site Inspection (SI) was completed in September 1983. Additional sampling was recommended at the conclusion of the SI. The additional sampling was conducted in February 1986. Based on the results of this sampling, the site was referred to the State of Texas on March 25, 1986.

Currently, the site is actively regulated under the State's Hazardous Waste Corrective Action Program. As such, it is recommended that the site receive a designation of "No Further Remedial Action Planned" (NFRAP) in CERCLIS. This designation does not preclude future federal involvement with the site should site conditions change or a request be made by the State. The State will be provided a copy of this decision document.
